2. Receiving and storage

2.1 Handling and storage

2.1.1 Handling

***NOTICE**: device damages. Always use packaging. Avoid bumps, strong vibrations and exposure to very high temperatures.*

2.1.2 Storage warnings

***NOTICE**: device damages. Consult the manufacturer and check the warranty conditions if the device is to be stored for a long period of time. Protect against vibration, moisture and shock. Store with a well-closed lid in a dry place. Avoid exposure to very low or very high temperatures.*

2.1.3 Environmental storage conditions

See chapter "Electrical specifications" on page 66.

2.2 Product identification

2.2.1 Package contents

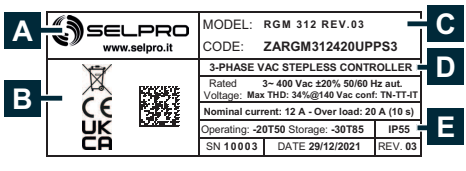
Below are the items provided in the sales package:

- one RGM
- this manual
- cable clamps or plugs (as per order)
- RGM internal sticker with illustrated instructions

Always check the integrity of the product. In case of damage, contact SELPRO technical support.

2.2.2 Identification label

Model, product code and serial number must be communicated to SELPRO technical support for service calls.



Part	Description
A	Logo and site
B	Matrix code to identify model and serial number, CE marking conformity with directives
C	Model, code and product revision
D	Device description
E	Technical specifications
